

Our portable snow and ice melting products can provide a convenient and effective solution to snow and ice accumulation in defined areas around your home or business. Comfort Radiant Heat Track Mats are ideal for walkways, driveways, stairs, decks, handicap ramps or loading docks as well as many other surfaces. Heat Track Mats provide a clean and safe passageway for foot, wheelchair or automobile access.

CONVENIENCE

Portable Radiant Heat Track Mats melt ice and snow without the effort of shoveling or blowing and preserve surfaces from harsh chemicals. Their convenient portability allows them to be used virtually anywhere snow and ice are problematic. Comfort Radiant Heat Track Mats melt up to 2" of falling snow per hour and cost as little as 60 cents per day depending on your local cost per kilowatt hour.

WORRY FREE RELIABILITY

Heat Track Mats are extremely durable and are designed to be left out for the entire winter season. The electrically operated heating element is sandwiched between two protective surfaces of non-slip rubber. They can be plugged directly into any 120v or 240v standard outlet using an equipment leakage circuit interrupter or can be hardwired directly into an electrical junction box.

SAFETY

Our Heat Track Mats are built and tested according to UL Standard 499 and CSAE 33501 electrical standards and all components are UL Listed and come with a 2 year warranty.

Comfort Radiant's Underlaymats

Our Underlaymat is designed to lay under your existing entrance mats. The Underlaymat has a smooth rubber surface and comes in a variety of sizes to easily fit under any entrance mat. They work as efficiently as our Heat Track Mat. Our Underlaymat is designed to be left out for the entire winter season.

Heat Track Rubber Stair Treads

An efficient and convenient way to eliminate snow and ice on stairs. The stair treads are made of a non-slip rubber surface to aid in the prevention of slips and falls. The treads are connected in groups of 2, 3, 4 or 5 treads and plug into any 120 or 240 volt standard outlet using an equipment leakage circuit interrupter (ELCI) or can be hardwired directly into an electrical junction box. All of our treads are provided with grommet holes to make securing the tread both simple and effective.

Heat Track Aluminum Stair Treads

These treads are designed to endure extra heavy foot traffic. The Aluminum Stair Treads are made of extruded aluminum with abrasive filler to provide extra traction, and are designed to be left out for the entire year.

All of Comfort Radiant's snow melting products are designed first with safety in mind. They are unsurpassed in quality and efficiency.
